

JOHN DOE

BACKEND ENGINEERING & DATA PIPELINES

Phone: +1-555-123-4567

Email: hello@example.com

LinkedIn: [johndoe](#)

GitHub: [johndoe](#)

Medium: [@johndoe](#)

Backend engineer focused on building scalable distributed systems. 12+ years of experience designing high-throughput data pipelines and APIs. Passionate about performance optimization and developer tooling.

SKILLS

Data Engineering: ETL pipelines, stream processing, batch processing, data modeling, data warehousing, event-driven architecture, message queues, data validation, schema design

Languages: Python, SQL, Java, Scala, Bash, Go

Technologies: Apache Spark, Kafka, Airflow, PostgreSQL, Redis, Elasticsearch, Docker, AWS, GCP

Practices: API design, testing, CI/CD, monitoring, documentation, code review

EXPERIENCE

COMPANY A

STAFF SOFTWARE ENGINEER

San Francisco, CA

Mar 2021 – Present (4.75+ years)

Technical lead for the data platform team, owning ingestion pipelines and real-time analytics infrastructure

- Redesigned event streaming architecture to handle 500k events/sec with 99.99% uptime
- Reduced cloud infrastructure costs by 45% through resource optimization and reserved capacity planning
 - Consolidated redundant services and implemented auto-scaling policies
 - Migrated batch workloads to spot instances with checkpointing
- Built internal developer platform for self-service data pipeline deployment
- Led cross-functional initiative to improve system observability and reduce MTTR by 60%

COMPANY B

SENIOR SOFTWARE ENGINEER

Seattle, WA

Jun 2018 – Feb 2021 (2.5+ years)

- Designed and implemented distributed task scheduler processing 10M jobs daily
- Architected migration from monolith to microservices, reducing deployment time from hours to minutes
- Mentored junior engineers and established code review practices for the team
- Created comprehensive runbooks and on-call documentation improving incident response

COMPANY C

SOFTWARE ENGINEER

Austin, TX

Aug 2015 – May 2018 (2.75 years)

- Built RESTful APIs serving 50M requests/day with p99 latency under 100ms
- Implemented caching layer reducing database load by 70%
- Developed CI/CD pipelines automating deployment across multiple environments

COMPANY C

JUNIOR SOFTWARE ENGINEER

Austin, TX

Jul 2013 – Jul 2015 (2 years)

- Developed internal tools for data processing and reporting workflows
- Wrote integration tests improving code coverage from 40% to 85%

CERTIFICATIONS

- CLOUD PROFESSIONAL ARCHITECT**
CLOUD PROVIDER
Renewed

Mar 2023 – Mar 2026

- KUBERNETES ADMINISTRATOR**
CLOUD NATIVE FOUNDATION

Jun 2022 – Jun 2025
